

The Overdose Prevention Through Intensive Outreach Naloxone and Safety Initiative (OPTIONS)

Project-to-Date Totals through July 31, 2023

Prepared by Daniel S. Soucier, Ph.D., Allisyn Tidd
Margaret Chase Smith Policy Center
University of Maine

This brief provides updates on the OPTIONS initiative based on data reported by OPTIONS liaisons. Liaisons are licensed behavioral health clinicians that are embedded within a law enforcement agency in each of the sixteen counties in Maine. At present, each county has one appointed liaison that works alongside law enforcement to provide short-term counseling interventions, conduct proactive outreach with communities at the highest risk of experiencing an overdose, de-escalate behavioral health crises, and engage in postoverdose follow up visits and referrals of persons in need, as well as affected others, to community- and state-based services.

This brief describes how referrals are generated for OPTIONS liaisons, who is referring clients to liaisons, referrals OPTIONS liaisons are making on behalf of their clients, the demographics of OPTIONS clients, overdose education and antistigma trainings, and linkages among other state programs from the project's inception in October 2020 through July 2023.

Additional resources, data, and visualizations are available at knowyouroptions.me and mainedrugdata.org.

Key Metrics Snapshot

During the most recent reporting period of June 2023 OPTIONS liaisons' engagement included

- 39** co-response calls, conducted alongside law enforcement partners
- 90** postoverdose follow-ups, conducted frequently alongside law enforcement partners
- 105** individuals referred to community-based treatment programs, with 50% (53) attending their first treatment appointment
- 152** individuals referred to community-based recovery support programs
- 136** individuals trained in overdose and antistigma education
- 297** kits (594 doses) of naloxone (Narcan®) distributed

From October 2020 through July 2023 (project-to-date-totals), OPTIONS liaisons' engagement included

- 1,586 co-response calls, conducted alongside law enforcement partners
- 2,254 postoverdose follow-ups, conducted frequently alongside law enforcement partners
- 2,212 clients referred to community-based treatment programs, with 79% (1,748) confirmed to have attended their first appointments
- 2,922 individuals referred to community-based recovery support programs
- 6,322 individuals trained in overdose and antistigma education
- 6,958 kits (13,916 doses) of naloxone distributed

How OPTIONS Liaisons Receive Clients

OPTIONS liaisons generate clients from operating alongside law enforcement officers as co-responders to nonfatal and fatal opioid overdoses as well as other substance-use-related public safety response calls. Co-response calls are those that OPTIONS liaisons respond to during the moment of crisis, whereas postoverdose follow-up visits are those that they respond to in the days following a substance-use-related crisis. Oftentimes, law enforcement partners accompany liaisons during both co-response calls and postoverdose follow-up visits.

OPTIONS liaisons also generate clients through self-referrals and proactive referrals. Self-referrals occur when individuals contact OPTIONS liaisons themselves. Proactive referrals are those made by public safety officials, clinicians, community-based substance use supports, and affected others.

The following chart and table show the number of law enforcement calls responded to and postoverdose follow-up visits conducted by liaisons along with the number of self and proactive referrals.

OPTIONS Response Calls and Self- and Proactive Referrals, Project-to-Date

Monthly Client Interactions for OPTIONS Liaisons

	Oct-Dec 2020	2021	Jan-Mar 2022	Apr-May 2022	Jul-Sep 2022	Oct-Dec 2022	Jan 23	Feb 23	Mar 23	Apr 23	May 23	Jun 23	Jul 23	Total
Co-response calls	N/A	555	133	181	233	171	41	46	71	47	35	34	39	1586
Post OD visits	N/A	715	192	249	299	247	94	76	66	68	77	81	90	2254
Self-referral	N/A	308	65	74	69	119	74	38	56	34	42	51	45	975
Proactive referral	N/A	763	424	579	674	566	214	248	241	213	251	257	251	4681

Proactive referrals to OPTIONS liaisons come from a variety of sources including law enforcement, treatment providers, affected others, other OPTIONS liaisons, recovery coaches, emergency department clinicians, and first responders. This data began being collected during the second year of the program in October 2021. The following two pie charts show the number and percentage of proactive referrals to OPTIONS liaisons as well as the number and percentage of self-referrals 18% (975) versus proactive referrals 82% (4,489). Law enforcement make up the preponderance of proactive referrals at 58% (2,527) followed by affected others 11% (485) and treatment providers 9% (398).

Proactive Referrals by Type, Project to Date

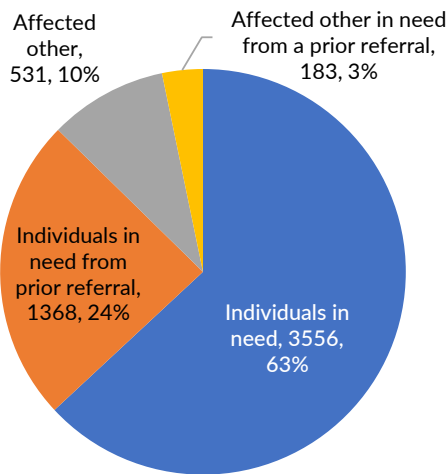

Note: Liaisons began reporting proactive referrals by type beginning in year 2 of the initiative (October 2021)

Clients Served by OPTIONS Liaisons

OPTIONS liaisons serve not only individuals in need but also affected others. In many counties, liaisons are known members of the community who are able to reach at-risk individuals and those that might not engage with other State-based harm reduction, treatment, recovery, or prevention services. The following four charts show the demographic breakdown of clients served by OPTIONS liaisons. 63% (3,556) of clients are individuals in need connecting with OPTIONS for the first time, 24% (1,368) are individuals in need who had previously connected with OPTIONS, 10% (531) are affected others connecting with OPTIONS for the first time, and 3% (183) are affected others who had previously connected with OPTIONS. 57% (3,698) of clients identify as male, 43% (2,746) identify as female, and <1% (15) identify as transgender. The ethnicity of clients is 6% (275) Hispanic/Latino and 94% (4,218) not Hispanic/Latino. The racial composition of clients is 82% (3,828) white, 8% (389) Black/African American, <1% (26) American Indian/Alaska Native, 9% (413) Two or more races/unknown, <1% Hawaiian/Pacific Islander (2), and <1% Asian (1).

OPTIONS liaisons are effective at reaching individuals in need and affected others that are experiencing housing instability and experiencing homelessness. The following charts show that 68% (3,774) of clients referred to OPTIONS liaisons since October 2021 are reported to be housing insecure; 38% (2,111) are unstably housed and 30% (1,663) are homeless. Those who have stable housing constituted 32% (1,828) of liaison clients.

Housing Status of Clients, Project to Date

Liaisons Connect Persons Struggling with Substance Use Disorder to Services

OPTIONS liaisons connect individuals with state- and community-based prevention, harm reduction, treatment, and recovery services. The first chart below shows client interactions and referrals to services. The second shows synergistic connections between OPTIONS liaisons and other State-supported programs across the six focus areas of the State of Maine Opioid Response Strategic Action Plan: infrastructure, public safety, prevention, harm reduction, treatment, and recovery.

OPTIONS liaisons refer individuals for treatment programs in the moment when their clients are ready by meeting them where they are at. They use warm handoffs where they dial the phone number of the treatment provider for their clients. Some liaisons also drive individuals to their treatment appointment or MOUD (Medication for Opioid Use Disorder) inductions. For the project to date,

- 2,212** clients were referred for community-based treatment programs
- 79%** attended their first appointment with the provider (1,748)
- 21%** unknown if they attended their appointment or not (475)

Client Interactions and Referrals by Type, Project to Date

Note: Referrals to MARR, Community Coalitions, Patient Navigators, Rapid Induction, and Continuing Source of Naloxone were not reported by OPTIONS liaisons until October 2021

OPTIONS liaisons also serve as community educators conducting a variety of trainings including Overdose Education and Naloxone Distribution and antistigma trainings. The chart and table show the number and cumulative number of trainings conducted, individuals trained, and naloxone kits distributed by OPTIONS liaisons. OPTIONS liaisons have conducted 723 trainings, trained 6,322 individuals, and distributed 6,958 kits (13,916 doses) of naloxone from October 2020 to July 2023.
